**Training Equipment
For Top Gymnasts**

product info sheet

Trampoline board

Ref. 1411325

This trampoline springboard has practically the same contact surface as a regular springboard but with dynamic properties comparable to a mini trampoline. The 38 springs covered with Bisonyl padding are set in a tubular frame. The height is adjustable from 28 to 38 cm per 2 cm. The board has two wheels in front for easy transport and has rubber floor protectors at all sides. The board has been designed for gymnasts up to maximum 60 kg and its goal is to make the transition from mini trampoline to Competition springboard an easier one. The impact on young joints is obviously a lot lower than that of a competition springboard or derivatives of the springboard. To be used under strict supervision only.
