For Top Gymnasts**

## product info sheet

### Low Balance Beam soft top 20 cm

Ref. 1414115

This extra wide low balance beam has been designed for training purposes. The extruded aluminium beam is the same as the competition beam. Length is according to the FIG specifications but the top has been made softer and twice as wide in order to allow girls to repeat the same exercise more frequently with a decreased risk of injury. The higher shock absorption is very comfortable for the gymnast. The balance between a softer top and stability is a very finely tuned one and allows for exercise repetition with reduced impact force while maintaining stability. Use on mats only with wooden foot supports.

#### Technical Data

- Width 20 cm, Length 5 meter
- Aluminum core with soft padding and upholstery
- Soft end caps
- Weight 72 Kg
- To be used on the floor, on mats only with a pressure divider
